

AYAAN MINHAS

Computer Science (Artificial Intelligence) Undergraduate

📍 Kuala Lumpur, Malaysia 📞 +60 10 650 1072 ✉ ayaanminhas1@gmail.com

🌐 [LinkedIn](#) 📁 [GitHub](#) 📁 [Portfolio](#)

PROFESSIONAL PROFILE

AI-focused Computer Science undergraduate at Asia Pacific University with a CGPA of 3.89 and hands-on experience across enterprise backend engineering, internal application development, AI orchestration, retrieval-augmented systems, on-device AI, and practical product prototyping. Former Software Engineer Intern at JurisTech and recent AI competition award-winner, with work spanning PHP/SQL enterprise workflows, AWS-hosted AI systems using S3, Lambda and Amazon Bedrock, Chutes AI implementation, and explainable AI applications built for real user decision flows.

TECHNICAL SKILLS

Programming Languages

Python, Java, Kotlin, C++, C#, JavaScript, TypeScript, PHP, SQL, and PL/SQL.

Web, Mobile & Application Development

Flask, Flutter, Angular, React, Streamlit, HTML/CSS, Android Studio, Joget DX, and full-stack prototyping.

AI, ML & Data Systems

RAG, embeddings, vector search, reranking, prompt engineering, local LLM inference, on-device generative AI, computer vision, and evaluation workflows.

Cloud, AI Providers & Agentic Workflows

AWS ecosystem development using S3, Lambda, Amazon Bedrock and hosted deployment workflows; Chutes AI; controlled agent/tool-use workflows; guardrails; and recruiter/user-in-the-loop design.

Databases, Delivery & Enterprise Support

Oracle Database, Git, GitLab workflows, Cloudflare Tunnels, UAT and production support, and debugging across multi-schema enterprise data flows.

EDUCATION

Bachelor of Computer Science (Hons) in Artificial Intelligence

[Asia Pacific University \(APU\), Kuala Lumpur | Sep 2023 - Jul 2026 \(Expected\)](#)

Academic Standing: CGPA 3.89, with Vice Chancellor's List recognition in the 2023/24 and 2024/25 academic years.

Programme Details: Dual-degree pathway with De Montfort University, United Kingdom.

Scholarship: Awarded a 30% academic scholarship.

GCE A-Levels

[Nixor College, Karachi | 2021 - 2023](#)

Result: 4 A* and 1 A.

Subjects: Further Mathematics, Mathematics, Computer Science, Physics, and Chemistry.

EDUCATION

GCE O-Levels

[Alpha High School, Karachi | 2018 - 2021](#)

Result: 9 A* and 1 A across 10 subjects.

Key Subjects: Mathematics, Additional Mathematics, Statistics, Computer Science, Physics, Chemistry, and English.

SAT

[College Board | 2022](#)

Total Score: 1500 / 1600; Mathematics 800 / 800 and Evidence-Based Reading and Writing 700 / 800.

PROFESSIONAL EXPERIENCE

Research & Development Assistant

Nov 2024 - Present

[Centre for Technology & Innovation \(CTI\), Asia Pacific University | Kuala Lumpur](#)

- Build and maintain internal and student-facing web applications using HTML, CSS, JavaScript, and Joget-based workflows.
- Contribute to prototyping, testing, and implementation of innovation-focused web and AI initiatives with emphasis on usable frontend delivery.
- Support frontend prototyping and Angular-based application development for migration-oriented web initiatives alongside modernization of legacy modules.
- Use AI-supported tools in day-to-day implementation, debugging, architecture exploration, and workflow planning.

Software Engineer Intern, ORCA Team

Aug 2025 - Nov 2025

[JurisTech | Kuala Lumpur](#)

- Designed and optimized SQL/PLSQL queries for data retrieval, reporting, validation, and backend workflow support.
- Developed and debugged PHP modules and integrated them with backend systems while handling real product-side issues in enterprise loan-origination flows.
- Worked with relational data structures, procedures, and multi-step business logic while troubleshooting performance and lookup-related issues.
- Supported work spanning PHP application logic, SQL/PLSQL coordination, and deployments across UAT and production-facing environments.

Chief Information Officer (CIO)

Feb 2022 - Feb 2023

[Nixor Creative Studios | Karachi](#)

- Led IT operations for a 50+ member team, managing website infrastructure, digital assets, and technical coordination.
- Directed the relaunch of the Sharkpress online journalism platform and supported major project delivery.
- Nominated for CIO of the Year.

PROJECTS

Jobest: Explainable AI Recruitment Shortlisting System

AI Marathon 2026 | 2nd Place

[AI Orchestration](#) | [Recruiter Workflow](#) | [Chutes AI](#)

- Built an end-to-end recruitment AI workflow that turns job context and candidate inputs into evidence-backed shortlisting recommendations instead of opaque scores.
- Implemented recruiter-in-the-loop decision flow, visible recommendation reasoning, candidate handoff concepts, and controlled agent/tool-use design.
- Won 2nd Place / 1st Runner-Up at AI Marathon 2026 and received a special prize for Best Chutes Implementation.

ReSource AI: Electronics Reuse & DIY Guidance Assistant

AWS Cendekiawan | Finalist

[AWS Ecosystem](#) | [Amazon Bedrock](#) | [Sustainability AI](#)

- Built an AWS-hosted assistant using services including S3, Lambda and Amazon Bedrock to help users turn unused electronics into safe, realistic DIY reuse projects.
- Designed the flow for device-condition input, effort-based project recommendation, step-by-step build guidance, and context-aware AI assistance.
- Selected as a Top 5 finalist in the Sustainability and Environment domain from 2,500 participants in the AWS Cendekiawan competition.

Minhas Rupsi Learning Platform

Flask | Full Stack | RAG

[Web & Mobile Learning Platform with RAG-Based Study Support](#)

[minhasrupsi.computer](#)

- Developed a full-stack learning platform using Flask and custom APIs across web and mobile surfaces.
- Designed a retrieval-augmented Computer Science AI over notes and past-paper-aligned content to deliver grounded answers on web and mobile.
- Worked on data cleaning, chunking, embeddings, vector retrieval, reranking logic, and deployment-oriented web integration.

89th Parallel LMS

Applied AI | Multi-Subject Retrieval

[Subject-Aware AI Assistant for Science Learning](#)

[89thparallel.me](#)

- Engineered a multi-knowledge-base retrieval system used across the platform's website and app.
- Implemented subject-aware routing so the backend loads the correct knowledge base and embeddings according to the learner's selection.
- Improved retrieval precision by separating subject domains instead of forcing one blended knowledge store.

TTS Hub: Unified Audio Generation Platform

Python | TTS | Watermarking

[Unified Platform for TTS, Voice Cloning & Audio Provenance](#)

[github.com/MrMystery8/tts-hub](#)

- Built a centralized hub that unifies six Apple Silicon-oriented TTS and voice-cloning stacks behind one web interface and orchestration layer.
- Integrated an audio provenance workflow covering watermark embedding, attacked-sample dataset generation, and supervised classifier training.
- Structured the project as a modular platform with workers, model registry, web UI, and documentation for experimentation-heavy development.

PROJECTS

Voice Note Summarizer

Flutter | Kotlin | On-Device AI

Offline Android App for Private Audio Summarization

github.com/MrMystery8/vm_summ

- Built a Flutter application with a native Kotlin inference layer running Gemma locally via LiteRT-LM for private, offline processing.
- Implemented serialized background execution, persisted queue state, and share-to-app flows for WhatsApp, Telegram, and file-manager ingestion.
- Added configurable prompts and presets so users can adapt outputs for meeting notes, romanized transcription, or summary-first workflows.

Injury Risk Prediction

Python | ML Pipeline

30-Day Football Injury Risk Modeling

github.com/MrMystery8/injury_prediction

- Built an end-to-end modeling pipeline to predict football injury risk using player-based datasets and inspectable artifacts.
- Created evaluation manifests, stage-wise reports, and UI layers for analysis through Streamlit and an optional React model studio.
- Focused on reproducibility, panel verification, and evaluation transparency rather than shallow headline metrics.

Glove Defect Detection

Python | Computer Vision

Glove Inspection & Defect Detection Pipeline

github.com/MrMystery8/glove_defect_detection

- Built a classical computer vision pipeline to segment glove regions, classify glove type, and detect structural and surface defects.
- Wrapped the system in a Streamlit application with tunable thresholds, debugging controls, and evaluation and inference scripts.
- Worked under implementation constraints that excluded Haar cascades, TensorFlow, and template matching.

Area-51 Browser Game

JavaScript | 3D Game Dev

3D Survival Game with Procedural Systems & Enemy AI

github.com/MrMystery8/area-51

- Developed a 3D web-based survival game featuring procedural terrain, resource systems, combat, crafting, and enemy behaviors.
- Used THREE.js for rendering and CANNON.js for physics to build a browser-based gameplay loop with immersive mechanics.

LEADERSHIP, TEACHING & COMMUNITY INITIATIVES

Organizer & Facilitator - AI Learning for Kids

Apr 2026

APU x Yayasan Chow Kit | Kuala Lumpur

- Organized and facilitated an introductory AI workshop for approximately 20-30 children from Yayasan Chow Kit at APU.
- Delivered age-appropriate sessions covering AI, machine learning, generative AI, and the basics and limits of LLMs.

Organizer & Facilitator - Leading in Uncertain Times with Rohit Talwar

Apr 2026

APU Leadership Talk | Kuala Lumpur

- Supported event planning, marketing, and execution for a leadership talk featuring futurist Rohit Talwar at APU.
- Contributed to promotion, coordination, and on-ground delivery for a session attended by approximately 50-60 participants.

Project Lead - SDG 6 Sustainability Webinar

Feb 2026

Student-Led Sustainability Initiative, APU | Kuala Lumpur

- Led coordination and execution of a hybrid webinar on water safety, sanitation, and sustainable community practices.
- Managed team alignment across webinar, logistics, and social media functions and framed the discussion around AI-supported sustainability decision-making.

Teaching Assistant - Python with AI Basics

Jul 2025

Minhas Rupsi at Kashan's Academy | Karachi

- Supported a 4-week crash course for 50+ learners through live debugging assistance, Q&A support, and practical demonstrations.
- Helped learners progress from Python fundamentals into Gemini-powered chatbot development using Google AI Studio and APIs.

Physics Senior Teaching Assistant

Sep 2022 - Mar 2023

Nixor College TA Program | Karachi

- Managed junior Physics TAs, coordinated with the Student Academics Team, and organized academic support for students.

Physics Teaching Assistant

Oct 2021 - Sep 2022

Nixor College TA Program | Karachi

- Provided part-time subject support, answered student queries, and maintained regular TA support hours.

AWARDS & RECOGNITION

- **AI Marathon 2026:** 2nd Place / 1st Runner-Up; awarded RM900 team prize and an additional RM250 special prize for Best Chutes Implementation.
- **AWS Cendekiawan:** ReSource AI selected as a Top 5 finalist in the Sustainability and Environment domain from 2,500 participants.
- **Google Labs Trusted Tester:** Early evaluator for Imagen 2, Whisk Animate, and Veo 2.
- **AI Art Creator, [@ai.illusions](#):** Built and manage an AI art community on Instagram with 15k+ followers.
- **CEMC Euclid Contest:** Certificate of Distinction, top 25% globally.
- **Scinnova V:** Grand Runners-Up overall.
- **APU Shark Tank:** Ranked 7th out of the top 50 participants.
- **Vice Chancellor's List:** Recognized in the 2023/24 and 2024/25 academic years.
- **Rubik's 5.0:** Winner in Kaleidoscope and A Fraction Ahead modules.
- **Quiz Masters 2.0:** 1st position.

CERTIFICATIONS

- **5G Pioneers Program** - Ericsson.
- **AI Agents Fundamentals** - Hugging Face.
- **AI X-Perience Workshop** - Applied AI workshop with generative and visual AI exposure.
- **Carbon Literacy Training** - De Montfort University.
- **De Montfort University Summer School** - International academic enrichment program.
